## **UV REACTA UB7010 SERIES UV SHEETFED**

Stehlin Hostag Ink UK has developed a new range of UV process inks. Which are suitable for new technology sheetfed litho presses with various damping systems which are required to run at high speeds due to today's demanding markets on a range of coated and uncoated papers and carton boards.

At Stehlin Hostag sophisticated production technology and the most exacting quality assurance procedures govern the entire production process this enables us to give you the most comprehensive and versatile range available to the offset printer.

Stehlin Hostag Inks comply with the guidelines of CEPE (European Confederation of National Coatings Associations) and the BCF (British Coatings Federation), endorsing the Acrylate preference criteria guidance for printing ink.

Stehlin Hostag Inks conform to the BCF Guidelines for Printing Inks for use on Food Wrappers and Packages but direct food contact must be avoided.

It is recommended that the substrates to be printed on are a functional barrier, which prevent the migration of ink components to food.

<u>Description</u>	<u>Code No</u>	<u>L/Fast</u>	<u>Spirit</u>	<u>Solvent Mix</u>	<u>Alkali</u>
Intense Pro Yellow	41UB7010	5	+	+	+
Intense Pro Magenta	42UB7010	4	+	+	-
Intense Pro Cyan	43UB7010	8	+	+	+
Intense Pro Black	49UB7010	8	+	+	+

### Special Properties

- Very high colour intensity
- Low dot gain
- Low misting
- Stable lithographic characteristics
- UV varnishable
- Suitable for laser printers
